

## **Java Developer** (Fulltime)

**14 arranging banks, more than 800 investors, over €22 billion successfully placed on vc trade**

**570.000 lines of code in 50 years of combined working hours**

**1 free position as a Java Developer**

**Are you in?**

vc trade - we are digitizing and revolutionizing the corporate finance market.

During our first year in 2018, we already established ourselves as the leading digital marketplace for Schuldscheindarlehen. Since then, we have been continuously driving innovation and digital solutions, setting new standards, and creating transparency as well as long-term added values for all capital market participants involved. With the secondary market for loans, we have opened up a further segment and are thus strengthening our position as the market leader for private debt.

We have set ourselves ambitious goals for 2022 and are committed to growing in a sustainable way. Our roadmap includes the digitization of further markets and products as well as numerous additional services. For this, we are looking for you to join our team in the role of a dedicated Java Developer.

### **Your tasks**

- As a Java Developer you are involved in all steps of our development process
- Together with your colleagues you develop new functionalities and processes for our platform
- You will work closely with product management and participate in the conceptual design of requirements
- In case of problems in our productive environment, you support error analysis and troubleshooting

## **We are looking for**

- 1-3 years professional experience in the implementation of web-applications
- Practical and recent experience with Java
- Initial experience with Kotlin and/or web technologies is an advantage
- Previous experience with agile working methods desirable
- Team player with independent, self-reliant way of working and high-quality standards
- Good knowledge of English (C1), knowledge of German is a plus

## **We offer**

- A Spring Boot application written in Java and Kotlin using REST and GraphQL to communicate with our Vue/Typescript Frontend
- Constantly growing development teams using Scrum methodology with members out of nine nations
- Flexible working hours, possibility of home office, 30 days of vacation
- Central and easily accessible location in Frankfurt / Berlin / Stuttgart
- Attractive compensation package
- Support for relocation and blue card process
- Further qualification measures, German language course, internal lunch & learn sessions
